Department of Software Engineering, AASTU

Internet Programming I (SWEG3107) - Project Report

Author: Abraham Tiruneh

Student ID: SWEG/2019/EC

1. Executive Summary

This project report documents the implementation of the HTML5 Personal Portfolio Web Application developed for the course Internet Programming I (SWEG3107) at Addis Ababa Science and Technology University (AASTU).

2. Architectural Design & HTML5 Compliance

The portfolio adheres strictly to modern web standards, featuring:

- Semantic Structure: <header>, <nav>, <main>, <article>, <section>, <aside>, <footer>
- Comprehensive Typography & Formatting: Headings, blockquotes, code blocks, lists
- Data Presentation: HTML5 Tables with <caption>, <thead>, <tbody>, <tfoot>, colspan & rowspan
- Form Controls: Advanced input validation, fieldsets, selects, radio buttons, checkboxes
- Multimedia: HTML5 Audio, Video with WebVTT captions, and embedded iframe
- Advanced Elements: <dialog>, <details>, <summary>, <meter>, <progress>, <time>, <canvas>
- Accessibility & Metadata: Full ARIA support, Open Graph tags, responsive viewports

3. Projects Overview

- EthioFarm: Smart Agricultural Marketplace & Farmer Advisory System
- Finkison AI: Automated Learning Platform with Real-time Diagnostics
- Text Toolkit: Python-based Natural Language Processing Data Toolkit
- AASTU SWEG Portfolio: Comprehensive HTML5 Multi-page Showcase

4. Conclusion

The application demonstrates proficiency in foundational web standards, semantic document structuring, and responsive presentation.
